**Foreign investment in eastern and southern Europe after 2008.** Béla Galgóczi 2015-12-01 This book investigates the role that foreign direct investment (FDI) in central-eastern and southern Europe has played in the post-crisis period, comparing patterns across countries and sectors. An overarching objective of this publication is to assess the extent to which FDI can still be seen as a key driver of economic development, modernisation and convergence for Europe's low- and middle-income economies, taking into account also the risks and limiting factors associated with FDI.

**Making the Difference** Dean Ashenden 2020-07-29 First published in 1982, Making the Difference has become a classic in the study of education and of Australian society. Hailed on publication as 'certainly the most interesting book written about Australian schools in a very long time [and] arguably the most important', it has since been recognised as one of the 10 most influential works of Australian sociology, 'not just a major argument, and a 'classic' point of reference, [but] an event, an intervention in ways of doing research and speaking to practice, a methodology, a textual style. it was designed to be read by a much wider audience than the standard sociological text, and it has succeeded'. Making the Difference draws on a detailed study of the schools and homes of the powerful and the wealthy, and of ordinary wage-earners. It allows children, parents and teachers to speak for themselves and from what they say it develops strikingly new ways of understanding 'educational inequality', of how the class and gender systems work, and of schools and their social roles. 'Equality of opportunity', co-education, and 'relevant and meaningful curriculum' are all questioned, sympathetically but incisively. Ranging across educational policy from system level to the everyday experience of kids and teachers, from the problems of schooling to the production of class and gender relations, this path-breaking combination of theory, research and politics remains engaging, thought-provoking, and relevant.

*The State of African Cities 2010* United Nations Human Settlements Programme 2010 The State of the African Cities 2010 goes above and beyond the first report, which provided a general overview of housing and urban management issues in Africa. With the subtitle: Governance, inequity and urban land markets, the report uncovers critical urban issues and challenges in African cities, using social and urban geography as the overall entry points. While examining poverty, slum incidence and governance, the report sheds more light on inequity in African cities, and in this respect follows the main theme of the global State of the World's Cities 2010 report. Through a regional analysis, the report delves deeper into the main urban challenges facing African cities, while provoking dialogue and discussion on the role of African cities in improving national, regional and local economies through sustainable and equitable development. The report has been drafted in cooperation with Urban Land Mark. Through an analytical survey of several African cities, the report examines urban growth, social conditions in slums, environmental and energy issues and, especially, the role of urban land markets in accessing land and housing.

**The Agrarian Question** Karl Kautsky 1988 Lenin described The Agrarian Question as the first systematic Marxist study of capitalism and agriculture and the most important event in economic literature since the third volume of Capital. This great work is regarded as Kautsky's main achievement and is a classic work of analysis.Kautsky's pariah status in the eyes of revolutionary Marxists resulted in many years of neglect, but his role and work are now commanding great attention. The analysis of the transformation of peasant economies by capital in The Agrarian Question is now seen as particularly relevant to contemporary Third World peasant economies.This remarkable translation, which brings out the humanity - and the humour - in Kautsky's writing, is more than a work of economic analysis: in a manner ahead of his time, Kautsky integrates questions of political strategy, ecology, sexuality and the family.The illuminating reassessment of The Agrarian Question in the introduction by Professor Teodor Shanin and Hamza Alavi examines in detail the political context, Kautsky's own life, the development of Kautsky's ideas within the work, and its contribution to our understanding of the world

*Encyclopedia of Environmental Science and Engineering, Sixth Edition (Print Version)* Edward N. Ziegler 2012-06-25 "The authors ... continue the pursuit of new knowledge, calculated to bring new fruits of health, safety, and comfort to man and his environs. The charms, as well as the subtle hazards, of the terms "conservation, preservation, and ecology" need to be crystallized so that the public and their decision-makers practice this complex art with clearer conception and perception than is apparent in recent bitter confrontations." —From the Foreword to the Fourth Edition by Abel Wolman What's New in This Edition: New entries on environmental and occupational toxicology, geoengineering, and lead abatement Twenty-five significantly updated entries, including expanded discussion of water supplies and waste water treatment, biomass and renewable energy, and international public health issues An expanded list of acronyms and abbreviations Encyclopedia of Environmental Science and Engineering, Sixth Edition is still the most comprehensive, authoritative reference available in the field. This monumental two-volume encyclopedia now includes entries on topics ranging from acid rain, air pollution, and community health to environmental law, instrumentation, modeling, alternative energy, radioactive waste, and water treatment. The broad coverage includes highly specialized topics as well as those that transcend traditional disciplinary boundaries, reflecting the interdisciplinary skills and knowledge required by environmental researchers and engineers. Featuring expert contributors representing industry, academia, and government agencies, the encyclopedia presents fundamental concepts and applications in environmental science and engineering. The entries are supported by extensive figures, photographs, tables, and equations. This sixth edition includes new material on water supplies and wastewater treatment, biomass and renewable energy, and international public health issues. New entries cover environmental and occupational toxicology, geoengineering, and lead abatement. The Encyclopedia of Environmental Science and Engineering provides a view of the field that helps readers understand, manage, and respond to threats to the human environment.
