Garrison - Your guide through the challenging waters of managerial accounting. For centuries, the lighthouse has stood as a beacon of guidance for mariners at sea. More than an aid to navigation, the lighthouse symbolizes safety, permanence, reliability, and the comforts of the familiar. For this reason, we have chosen to illustrate the Canadian eighth edition of *Managerial Accounting* by Garrison, Chesley, Carroll and Webb with an image that encapsulates the greatest strengths of this market leading text. Garrison is your guide

through the challenging waters of managerial accounting. It identifies the three functions managers must perform within their organizations—plan operations, control activities, and make decisions—and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. *Managerial Accounting* focuses, now as in the past, on three qualities: Relevance, Balance and Clarity. The authors' steady focus on these core elements has led to tremendous results! As seafarers look to the lighthouse for direction along unfamiliar shore, so too can Garrison act as a compass for students seeking to master this course.

Breakeven Analysis Michael E. Cafferky
2010-08-11 This book explains the vocabulary of cost-volume-profit (breakeven) analysis (CVP), explores the breadth of applications of CVP, and illustrates the use of CVP concepts in a broad range of management and marketing scenarios. The book examines the proper identification of a

'unit', the various formulations of breakeven, profit planning using the breakeven formulas, and the application of CVP in sensitivity analysis. Each chapter will offer several important ingredients for a practical 'how to' approach: the type of data needed, the formula, how to calculate and interpret the math, a specific example followed by a brief review of the assumptions and limitations of that method.
