Snowden is a former Senior Advisor to the NSA, a former Field Officer with the CIA, and a former lecturer for the United States Defense Intelligence Agency. He had confidential information he wanted to share with Greenwald, but would only do it if he knew their connection was secure. Greenwald is a journalist known for his reporting on the wrongdoings of the National Security Agency (NSA). Snowden wanted Greenwald to use PGP (pretty good privacy) encryption on his computer so that he could safely send him some information that he had gathered. Although Greenwald considered adding these extra security measures to his computer, he was very busy with other things and did not want to take the time to put the complicated software in place. Snowden sent him a guide on how to add the encryption, but Greenwald still took no action. Snowden offered to find someone who could help Greenwald install the system. Without positive proof that the information Snowden had was really newsworthy, Greenwald did not feel motivated to take the steps necessary to install the PGP encryption. However, without a secure form of communication in place, Snowden was unwilling to risk sharing the information he had with Greenwald. This communication between the two took place over several weeks and then came to a standstill. On April 18, Laura Poitras contacted Greenwald. Laura Poitras is a documentary filmmaker who is known for fearlessly taking risks in making her films. No Place to Hide Bill Sly 2016-08-19 No Place to Hide: Alpha Company at Nui Ba Den puts into words what few can imagine and even fewer have experiencedthe harrowing and life-altering experience of facing deadly assaults from snipers. The U.S. Army's Alpha Company, deployed in Vietnam in 1969, followed orders sending it toward a mountain, Nui Ba Den. There they encountered North Vietnamese snipers, secure on higher ground, who subjected the company to two days of unremitting attack. In the end, nine members of the company and two of Charlie Company who came to their aid lost their lives. The author, Bill Sly, survived both the battle at Nui Ba Den and the Vietnam War. A college degree in history education and his military duties writing narratives to support awards of the Medal of Honor provided him with the background and expertise to bring to life his first-hand experience with the war and this particular engagement. In the pages of No Place to Hide, he tells the story of this company and its men who served, fought, and died and those who survived to remember and to remind others of the sacrifices of their comrades. No Place to Hide: Alpha Company at Nui Ba Den honors the men who fought together, remembers the sacrifices of those who died, and preserves the history of the events it depicts.

‘I Have Nothing to Hide’ Heidi Boghosian 2021-07-13 An accessible guide that breaks down the complex issues around mass surveillance and data privacy and explores the negative consequences it can have on individual citizens and their communities. No one is exempt from data mining: by owning a smartphone, or using social media or a credit card, we hand over private data to corporations and the government. We need to understand how surveillance and data collection operates in order to regain control over our digital freedoms—and our lives. Attorney and data privacy expert Heidi Boghosian unpacks widespread myths around the seemingly innocuous nature of surveillance, sets the record straight about what government agencies and corporations do with our personal data, and offers solutions to take back our information. “I Have Nothing to Hide” is both a necessary mass surveillance overview and a reference book. It addresses the misconceptions around tradeoffs between privacy and security, citizen spying, and the ability to design products with privacy protections. Boghosian breaks down misinformation surrounding 21 core myths about data privacy, including: • “Surveillance makes the nation safer.” • “No one wants to spy on kids.” • “Police don’t monitor social media.” • “Metadata doesn’t reveal much about me.” • “Congress and the courts protect us from surveillance.” • “There’s nothing I can do to stop surveillance.” By dispelling myths related to surveillance, this book helps readers better understand what data is being collected, who is gathering it, how they’re doing it, and why it matters.

No Place to Hide Glenn Greenwald 2014-05-13 A groundbreaking look at the NSA surveillance scandal, from the reporter who broke the story, Glenn Greenwald, star of Citizenfour, the Academy Award-winning documentary on Edward Snowden In May 2013, Glenn Greenwald set out for Hong Kong to meet an anonymous source who claimed to have astonishing evidence of pervasive government spying and insisted on communicating only through heavily encrypted channels. That source turned out to be the 29-year-old NSA contractor and whistleblower Edward Snowden, and his revelations about the agency's widespread, systemic overreach proved to be some of the most explosive and consequential news in recent history, triggering a fierce debate over national security and information privacy. As the arguments rage on and the government considers various proposals for reform, it is clear that we have yet to see the full impact of Snowden's disclosures. Now for the first time, Greenwald fits all the pieces together, recounting his high-intensity ten-day trip to Hong Kong, examining the broader implications of the surveillance detailed in his reporting for The Guardian, and revealing fresh information on the NSA's unprecedented abuse of power with never-before-seen documents entrusted to him by Snowden himself. Going beyond NSA specifics, Greenwald also takes on the establishment media, excoriating their habitual avoidance of adversarial reporting on the government and their failure to serve the interests of the people. Finally, he asks what it means both for individuals and for a nation's political health when a government spies so invasively into the private lives of its citizens—and considers what safeguards and forms of oversight are necessary to protect democracy in the digital age. Coming at a landmark moment in American history, No Place to Hide is a fearless, incisive, and essential contribution to our understanding of the U.S. surveillance state.

No Place to Hide W. Lee Warren 2014-05-06 A War Zone of the Soul Dr. W. Lee Warren's life as a neurosurgeon in a trauma center began to unravel long before he shipped off to serve the Air Force in Iraq in 2004. When he traded a comfortable if demanding practice in San Antonio, Texas, for a ride on a C-130 into the combat zone, he was already reeling from months of personal struggle. At the 332nd Air Force Theater Hospital at Joint Base Balad, Iraq, Warren realized his experience with trauma was just beginning. In his 120 days in a tent hospital, he was trained in a different specialty—surviving over a hundred mortar attacks and trying desperately to repair the damages of a war that raged around every detail of every day. No place was safe, and the constant barrage wore down every possible defense, physical or psychological. One day, clad only in a T-shirt, gym shorts, and running shoes, Warren was caught in the open while round after round of mortars shook the earth and shattered the air with their explosions, stripping him of everything he had been trying so desperately to hold on to. Warren's story is an example of how a person can go from a place of total loss to one of strength, courage, and victory. Whether you are in the midst of your own crisis of faith, failed relationship, financial struggle, or illness, you will be inspired to remember that how you respond determines whether you survive—spiritually, emotionally, and sometimes physically. It is the

beginning of a long journey home.
